Embrace  
**Sustainable, Eco Friendly  
Packaging solutions**  
Packaging made friendly

# About Earthyeco

Making simple changes in your routine life can have a **positive impact** on environmental sustainability, especially **choosing disposable plates, bowls, and containers** made from bagasse or other sustainable materials instead of traditional plastic can significantly reduce your environmental footprint. These alternatives are biodegradable and often compostable. Through world-class facilities, deep domain knowledge and capacity for high-volume manufacturing, we are leading the future of foodservice packaging.

Devoted to create a better planet, Earthyeco Tech Solution's compostable eco-friendly packaging offers a variety of eco-friendly, sophisticated, and fairly priced single-use Sustainable packaging that appeal to the environmentally-and socially-conscious consumer.

To keep the environment safe from toxic products, we came across the best substitution for plastic & other hazardous products. Following the government's footsteps, we tried our bit to contribute and protect the planet by starting to manufacture Eco-Friendly products.

## What Makes Us Special

-  **Microwave-safe**
-  **Made from 100% renewable sugar cane fiber**
-  **Water & Oil Resistant**
-  **Home Compostable**
-  **Sustainably Sourced**

# Our **Mission**

To pioneer a sustainable revolution in the disposable products industry by providing innovative, eco-friendly alternatives. Our mission is to reduce environmental impact through the production of biodegradable and compostable solutions, such as bagasse containers, paper food boxes, and straws, while promoting responsible consumption and a greener future.

# Our **Vision**

Our Vision is to be the leading force in shaping a world where single-use items contribute to, rather than detract from, environmental sustainability. We envision a future where disposable plates, bowls, and other products are made from renewable resources, ensuring minimal impact on the planet, and where consumers actively choose eco-friendly options to foster a healthier and more balanced ecosystem.

# Why Choose **Earthyeco?**

Our quality policy is devised to guarantee that our products are produced fairly and adhere to strict procurement and delivery practices. Dwelling stringent rules and statutes, we are responsible for obtaining the best-suited inventory of raw materials. Moreover, our business viewpoint and desirable working circumstances are inspected via a series of inspections and audits to verify the depth of the finished products.

# Technology

ALWAYS A STEP AHEAD

**Earthyeco**  
▪ TECH SOLUTIONS ▪

We are pioneers in introducing **hi-tech innovations** that are a breakthrough in the industry with fully automatic technology, which is used to manufacture the desired pulp molded products.

## How it is Made?

1. Bagasse, the residual sugarcane, undergoes churning and transformation into pulp.
2. This pulp is then molded into high-quality tableware through the application of high temperature and pressure.
3. Earthy Eco-tech product is 100% compostable and capable of decomposing in your backyard home compost.

## FROM THE FOUNDERS

Meet the driving force behind our venture, the Founder and Partner, **Mrs. Alpa and Mr. Nirmal** a dynamic entrepreneur whose vision and dedication shape the core values of our business.

**Mrs. Alpa**, a distinguished **Doctor**, brings a unique perspective to our venture, drawing from her extensive experience in the field of healthcare. Her keen understanding of the factors influencing health improvement in daily life adds a valuable dimension to our approach.

**Mr. Nirmal, a civil engineer by profession**, focus extends beyond the present, recognizing the importance of practices that safeguard the planet for the well-being of not just the current generation but also those to come.

Their shared vision propels our organization towards a future where health and sustainability converge, creating a legacy that resonates with the values of today and the aspirations of tomorrow.

Join us on a journey guided by these inspiring entrepreneur, where healthcare and environmental stewardship integrate for a better, more sustainable future.

## FAQ (Frequently Asked Questions)

### What does compostable mean?

Composting is the process of breaking down organic waste by microbial digestion to create compost. Compost has many beneficial uses including improving and fertilizing soil. To go through a composting process, organic waste requires the right level of heat, water, and oxygen. In a pile of organic waste, there are millions of tiny microbes that consume the waste, transforming the organic materials into compost. Earthyeco Tech Solution's compostable products completely decompose in a composting setting in a specific time frame, leaving no harmful residues behind.

### What is the required time for compostable packaging to completely break down?

Earthyeco Tech Solution's compostable packaging solutions naturally break down in compostable conditions within 90-120 days.

# Global Presence

**EarthyEco Tech Solution's**, eco-friendly packaging products have experienced a significant surge in global presence in recent years. With increasing awareness of environmental issues and a growing emphasis on sustainability, consumers and businesses alike are actively seeking alternatives to traditional packaging materials that contribute to pollution and waste. From biodegradable plastics to compostable materials derived from renewable resources like corn starch or bamboo, the market for eco-packaging solutions has expanded rapidly. Governments and regulatory bodies worldwide are also implementing policies to encourage the adoption of eco-friendly packaging, further driving the global presence of these products. Moreover, major corporations are increasingly committing to sustainable practices, incorporating eco-packaging into their supply chains and product offerings. This widespread adoption reflects a collective effort to mitigate the environmental impact of packaging while meeting the demands of a more conscientious consumer base, thereby shaping a more sustainable future for packaging worldwide.
